IMPORTS
    TRAP-TYPE                FROM RFC-1215
    comtekVmsNMConsoleSubagent
                                FROM COMTEK-DEFINITIONS-MIB
    cCfgVersion, cConsoleOutput, cConsoleTag, cSwErrFile,
    cSwErrLineNum, cSwErrMessage, cSwErrStatus, cTrapNextSeqNum,
    cTrapTime
                                FROM COMTEK-VMS-NM-CONSOLE-MIB;

-- SECTION 2: Generic Trap Definitions

-- SECTION 3: COMTEK VMS User Trap Manager Subagent Trap Definitions

cColdStart TRAP-TYPE
    ENTERPRISE                comtekVmsNMConsoleSubagent
    VARIABLES                  { cTrapNextSeqNum, cTrapTime, cCfgVersion }
    DESCRIPTION
        "A cColdStart trap signifies that the sending protocol entity
        is reinitializing itself such that the agent's configuration
        or the protocol entity implementation may be altered."
    ::= 0

cWarmStart TRAP-TYPE
    ENTERPRISE                comtekVmsNMConsoleSubagent
    VARIABLES                  { cTrapNextSeqNum, cTrapTime }
    DESCRIPTION
        "The NM*Console Subagent process has been reinitialized."
    ::= 1

cSwErr TRAP-TYPE

```

```
ENTERPRISE      comtekVmsNMConsoleSubagent
VARIABLES      { cTrapNextSeqNum, cTrapTime, cSwErrStatus, cSwErrFile,
                cSwErrLineNum, cSwErrMessage }
DESCRIPTION
    "Software error encountered.  This trap indicates that NM*Console
    was unable to perform some action and explains the error.  This
    trap is typically encountered if cCfgFile is set to a new file name
    which is erroneous or contains invalid data."
::= 2
```

```
cTermProc TRAP-TYPE
```

```
ENTERPRISE      comtekVmsNMConsoleSubagent
VARIABLES      { cTrapNextSeqNum, cTrapTime }
DESCRIPTION
    "NM*Console Subagent process termination."
::= 3
```

```
cConsoleResult TRAP-TYPE
```

```
ENTERPRISE      comtekVmsNMConsoleSubagent
VARIABLES      { cTrapNextSeqNum, cTrapTime, cConsoleTag, cConsoleOutput }
DESCRIPTION
    "NM*Console command result.  This trap contains a line from the
    output file generated from executing a remote console command.  The
    cConsoleTag field identifies the tag that accompanied the command."
::= 4
```

```
END
```
